

The future of Defi  
is people.

- why list on  
**JoinCoin.io**

## Get noticed

Through our listing/auditing platform and our ever-growing partnerships, we can create a safer environment for everyone and unite all communities under one roof. Our "Website Replacement" service will eliminate the need for your own website, whilst offering exposure that existing and upcoming projects need. [Listing on JoinCoin.io is what separates legitimate projects from the fraudulent ones.](#)

## Get empowered

Listed projects that are KYCed will gain access to our launchpad free of charge. Verified tokens/projects will have access to more features such as customizable pages, booking AMAs, integrating dApps and much more.

## Partner up

Our strategic partnerships are growing day by day and your success is our success. Listed projects that are KYCed will have access to all of our security, utility and marketing partners. Say goodbye to paying over the odds for fast track listings or illegitimate agents.

- 2022 Roadmap and Utility Development

- why did it all start

- The influx of investors into cryptocurrency is increasing more than ever but its deregulation is a cause for concern.

Cryptocurrency tokens launch daily but there exists no regulator to protect investors from being exploited. JoinCoin's advanced listing / auditing systems seeks to bridge this gap.

- JoinCoin's original premise as the LinkedIn of cryptocurrency, was set back as we realised that the low barriers to entry in cryptocurrency allows rogue companies to set up as legitimate entities to embezzle investors.

An industry standard is required to pave a way for the mainstream investor into cryptocurrency. Auditing systems, powered by the PulseReport™ in place will siphon out malicious companies, making cryptocurrency safer for all.

- JoinCoin will be web 3.0's networking hub, the leading epicenter for where audited cryptocurrency projects will launch, mitigating the financial risk to investors, and all others part of the web 3.0 revolution. JoinCoin will be staple for every project to launch from, acting as a "website replacement", a reliable source of exposure, amplifying traffic and investment to their project.

The platform will allow skilled labours to be employed, cryptocurrency companies to collaborate, and investors make informed decisions collectively, JoinCoin aims to be the largest networking hub in cryptocurrency.

# the code. and beyond

The PulseReport is the heart of JoinCoin's auditing system. Based on our unique "beyond the code" ethos, the report not only investigates the backend contract of the token, but will also test the utility backing the token, wallet sizing, commitment level of the developers culminating in a Sentiment rating for the company. This rating informs potential investors and business partners how trustworthy a particular project is. Auditees must prove that they possess the necessary resources, including finances and an adequately skilled team to complete their objectives. If they fail to do so, this will negatively affect their sentiment rating.

JoinCoinPay

# the real burner

JoinCoinPay is a payment facilitator that will guarantee satisfaction between users. Talents will be allowed to list gigs for investor to buy and vice versa, with in-app chat function to make business dealing safe and easy.

We will lock the full amount of \$Join that is required to fulfill the transaction and will only release it to the service provider after the job is complete. A total percentage of 10% will be cut from both parties and will be burned permanently.

The more we grow as a service, the more we grow in price.
